Setting up your IDE - Visual Studio Code + GitHub

Installation guide

Required plugins:
Visual Studio Code: Remote - SSH

Connect to the SSH using Uni credentials, remember to use VPN
Afterwards press Open folder, press enter

Cloning the Git repo to your login node on the cluster

You'll need to generate a ssh key on your cluster
$ ssh-keygen

Then copy it
$ cat ~/.ssh/id_rsa.pub

And afterwards you need to add it in your Github Settings, as a new SSH key. Clone the Git repo to your login node.
